Volume 5, no. 3, doi: 10.1128/mBio.01125-14, 2014.

In the Results and Discussion section (PDF page 3, line 11), TCA should have been introduced as an abbreviation for tricarboxylic acid, not trichloroacetic acid.

In the Supplemental Material, for Table S1B (Fisher Exact Test in Stationary Phase of Growth), the explanation of the parts of the table should read as follows:

Top to bottom parts: Genes are ordered from highest to lowest FDR values

Upper part: Genes with significant lower expression in FS versus DS

Middle part: Genes with significant higher expression in FS versus DS

Lower part: Genes with no significant differential expression
